

## CORRECTION OF OPEN BITE

### CAUSED BY PACIFIER

Dr. Wassim Aoun

THE PARENTS OF THIS 7-YEAR-10-MONTH-OLD PATIENT, WHO PRESENTS WITH AN ANTERIOR OPEN BITE (PRIMARILY CAUSED BY PROLONGED PACIFIER USE), CONSULTED US FOR ADVICE ON HOW TO TREAT THIS MALOCCLUSION.

**WE RECOMMENDED A REMOVABLE APPLIANCE AND SWALLOWING EXERCISES WITH FROGGYMOUTH.**

THE PATIENT DISAPPEARED FOR A YEAR, LOST THE APPLIANCE AFTER FOUR MONTHS OF USE, BUT CONTINUED USING THE FROGGYMOUTH, AS IT WAS THE ONLY WAY HER PARENTS ALLOWED HER TO WATCH TV.

**HERE ARE THE RESULTS OF THE TONGUE REHABILITATION WITH FROGGYMOUTH AFTER ONE YEAR.**

START OF TREATMENT

1 YEAR LATER

FROGGYMOUTH
